CORPORATE CULTURE

1. *Corporate objective: Rather than emphasizing the reasons why you can't do it, we should think about the ways to solve it.*
2. *Corporate vision: To create an excellent Chinese enterprise and build a world-renowned brand.*
3. *Corporate mission: Advocate environmentally friendly, healthy and low-carbon food packaging solution.*
4. *Core values of Jiurong packaging:*
 - *Respect employees' and clients' belief;*
 - *To pursuit the highest achievement, to be the best;*
 - *The success of company depends on the strength of everyone, not on the strength of an individual;*
 - *Be honest, not to deceive anyone, not to do all the immoral things;*

OUR ECO FRIENDLY APPROACH

CORNSTARCH

It can be converted to a thermoplastic polyester known as PLA, an eco-friendly material just like regular plastic and it is completely compostable. Though, it can't withstand high temperatures, PLA is a versatile material that can be used in a variety of ways.

BAMBOO

Bamboo is the fastest growing plant on the planet, needing very little water to do so and absolutely zero chemicals. It is completely biodegradable. One of our most popular materials for making paper food packaging products.

WOOD

We use FSC wood pulp paper which can be traced. It's widely used in most of our paper products such as paper cups, paper straws, food containers...etc.

BAGASSE

Bagasse comes from the natural residue of the sugarcane harvest. It is a suitable material, completely biodegradable and compostable. Can be used to make paper cups and paper food containers.

CARDBOARD & PAPER

Our cardboard and paper products are natural and recyclable with food grade certifications.

RECYCLED PLASTIC & RECYCLABLE PLASTIC

Polyethylene terephthalate, or PET is a recycled plastic made from fossil fuels like natural gas. We use it to make cold drink cups and food containers. PET is recyclable which makes it a renewable material, ensuring that the material is sustainable and leaves.

DIN-Geprüft industrial compostable

standard offers comprises tests for industrial compostability (e.g. according to EN 13432, ISO 17088, EN 14995, ASTM D 6400) based on the four basic aspects material characterization, biodegradability, disintegration and ecotoxicity.

BPI

BPI is North America's leading certifier of compostable products and packaging.

BRC No.2135231

The British Retail Consortium (BRC) is a trade association for the UK food retail industry created in 1992.

Audit ID :107435

A management system, supports companies to drive social compliance and improvements within the factories and farms in their global supply chains

BV-COC-128563

An independent, non-governmental, not for profit organization established to promote the responsible management of the world's forests

No.17918Q11564ROS

A quality assurance system which is the foundation for the development and growth of companies.

SHAHG1710965801

A federal agency of the United States Department of Health and Human Services

SHAHG1717446703 A02

It is the most important basic legal document of German food hygiene management

EUTR DDS

EUTR is an abbreviation of English European Union Timber Regulation. This is a mandatory regulation that came into effect in March 2013 and was implemented for operators and traders. This regulation is called: EU Timber Regulation No. 995/2010.

QS XK16-205-00409

The abbreviation "QS" of the "Qiyeshipin Shengchanxuke" of the "Enterprise Food Production License" is indicated by the Chinese character abbreviation QS (quality safety), which is different from the original English abbreviation QS (quality safety). It also has a different meaning from the quality standard ("quality standard").

Due to the edible nature, bagasse tableware has a more significant advantage than wood pulp, straw pulp and reed pulp. With the long fiber length of sugarcane, and strong plasticity, when made into finished products, it is not necessary to add adjuvants for molding, which fully guarantees 100% products.

It has the following characteristics:

- Hot and oil proof, no leakage, no deformation.
- Clean, hygienic, non-toxic, harmless, healthy
- With recycling value, sustainable, protection of resources.
- Natural degradation to organic fertilizer, returning to nature (natural degradation period of 180 days)"
